

Delta Star Completes Quebec Facility Acquisition

Lynchburg, VA (August 1, 2015) Last June, Delta Star announced the forthcoming acquisition of the Alstom Quebec plant located in Saint-Jean-sur-Richelieu. Delta Star is now pleased to announce that after much discussion an agreement has been reached and the acquisition has been closed.

We are excited to expand our production capabilities into Canada and believe the efforts of our combined teams will bring added value and greater opportunity to our business partners. The Quebec facility has exceeded our hopes for a business that can continue the tradition Delta Star has for excellent service, deep expertise, and quality transformers. We are excited about the prospects ahead as we blend the considerable talents and products of Delta Star and the Quebec facility.

With over 100 years of manufacturing experience, Delta Star, Inc. is the leading producer of power transformers and the premier manufacturer of mobile substations in North America.
